Summary

iOS & tvOS engineer with ~4 years building production consumer apps across OTT/streaming, health-tech, IoT, and e-commerce. Deep with SwiftUI, the tvOS focus engine, StoreKit 2 subscriptions, AVPlayer media playback, and Kotlin Multiplatform (KMP) native bridging. Have shipped 10+ apps to the App Store and built features end to end as a sole developer. Currently building a live sports scorecard SDK for tvOS/iOS at a product-based OTT company.

Technical Skills

Languages: Swift, Objective-C, Java (Android), Kotlin (KMP interop)

UI & Frameworks: SwiftUI, UIKit, tvOS Focus Engine, Combine, async/await, AVKit/AVPlayer, Core Bluetooth (BLE)

Architecture: MVVM, Codable model design, modular SDK development, KMP-native (StoreKit) bridging

Platform & Tooling: StoreKit 2 (subscriptions, per-storefront pricing), WebSocket/SSE, Swift Package Manager, CocoaPods, Git, SwiftLint, Razorpay/Stripe, App Store Connect

Experience

iOS & tvOS Engineer

Feb 2026 – Present

[Logituit \(OTT / Streaming products\)](#)

Bengaluru

- **meWatch (tvOS & iOS):** building a live match scorecard overlay SDK shown on-screen during live sports; engineered complex tvOS focus-engine navigation (circular tab bar, two-level focus hierarchy, UIFocusGuide focus trap) and scroll-position restoration for live commentary feeds.
- **EROS Universe (KMP):** own the iOS subscription layer in a Kotlin Multiplatform app — StoreKit 2 subscriptions with per-storefront (INR/USD) pricing, plus native iOS work not supported in shared KMP code.
- **Sun NXT — Shorts (iOS & tvOS):** sole developer of a Reels/Shorts short-video feature, built end to end across both platforms on an AVPlayer-based playback architecture.

iOS Developer

Apr 2024 – Feb 2026

[Tantech Technologies](#)

Delhi

- Led iOS development for e-commerce applications, owning architecture and delivery as the most senior mobile engineer on the team.
- Guided Android and backend developers on API contracts, app architecture, and release practices.

iOS Developer (Sole Developer)

Aug 2023 – Feb 2024

[RUSÉ](#)

Bengaluru

- Built the entire iOS app (RUSÉ Homes) from scratch: a marketplace for smart-home device packages and a DIY hub of install guides and videos.
- Implemented multi-brand device control — Wipro bulbs and smart plugs (on/off, dimming, power monitoring) and Philips Hue (on/off, dimming).

iOS Developer

Jan 2023 – Aug 2023

[Agatsa Software](#)

Noida

- Developed the iOS app for SanketLife, a pocket-sized ECG device: BLE pairing, guided ECG capture, PDF report export, and cardiologist connect.
- Resolved SDK integration issues and app bugs for external clients embedding the ECG SDK.

Android → iOS Developer

Feb 2022 – Dec 2022

Mirrorsize US Inc.

Noida

- Started as Android developer; moved to iOS within 3 months and contributed to 10+ shipped apps for AI-based body sizing and custom clothing.
- Built SwiftUI apps (MVVM, async/await) covering the full flow: garment selection, guided photo-capture for measurement, address & payments (Stripe/Razorpay), and order history; one app shipped bilingual (English/Spanish).

Selected Shipped Apps

iOS (SwiftUI / MVVM): Corpo3d, David Alan, HH Custom Tailor, Marlo White, TBC App

iOS (UIKit / MVVM): G2 Performance, Power10 Sports

Android (Java / MVVM): Lapco, Abform

Education

B.Tech, Information Technology
